***MLS® HPI Benchmark Price**

The MLS® Home Price Index (HPI) provides timely, accurate, and detailed information on home price trends in residential markets of participating real estate boards in Canada. Average or median prices can change a lot from one month to the next and paint an inaccurate or even unhelpful picture of price values and trends. The MLS® HPI is based on the value home buyers assign to various housing attributes, which tend to evolve gradually over time. It therefore provides an “apples to apples” comparison of home prices across the entire country.

Each month, the MLS® HPI uses more than 15 years of MLS® System data and sophisticated statistical models to define a “typical” home based on the features of homes that have been bought and sold. These benchmark homes are tracked across Canadian neighbourhoods and different types of houses.

More information on the MLS® HPI can be found on the [REALTORS® Association of Edmonton website](http://www.realtorsofedmonton.com) or the [Canadian Real Estate Association website](http://www.crea.ca).
